K5700 Mini Gander

Technicians and Swat members can safely assess dangerous situations using the Mini Gander.. Durable, effective cameras allow the Mini Gander to relay vital information to technicians, securing an area before approaching.

Although it contains sensitive equipment, the powerful Mini Gander can puncture many hard surfaces such as walls and windows. As a smaller unit than the VIP Gander, the Mini has enhanced maneuverability. As a gripper mounted tool, the Mini Gander is used in numerous confined areas: under cars, into trailers and crawl spaces.

- Two Low Light Cameras
- 360 Degree View Capabilities
- Robot Laser Switch Adjustable Lights and Cameras
- Diverse Piercing Abilities
- Minimal Setup Time
- Gripper Mounted
 - Low Maintenance Aluminum and Steel components
