DOOR STOP

Q: How long does it take a skilled operator to get a robot through a spring loaded fire door?

A: Too long, consuming precious time and battery power

GI² Technologies has developed a simple mechanical device that will allow any operator to overcome a spring loaded door in a matter of minutes.

FEATURES:

SIMPLIFIES THE TASK OF OPENING SPRING LOADED DOORS

DURABLE CONSTRUCTION

EASY TO USE

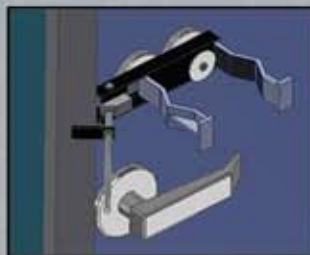

REUSABLE MAGNETIC BASE

OPTIONAL ADHESIVE MOUNTS FOR NON-METALLIC DOORS

Step 1:
Snap magnetic base
to door

Step 2:
Release grippers
and turn knob then system
will hold door open

Step 3:
Slide grippers into open-
ing and push door open
