Electric Breech

- Stainless Steel and Aluminum elements
- Diverse Projectile Types
- Compatible with Multiple Standard PAN Threaded Tools (must tell us if you are using on a PAN or on a T3 disrupter) There are two different threaded adapters
- 24 volt Robot Initiation
- 50 cap Blasting Machine Initiation
- Standard PAN Percussion Ammunition (L-Tech approved only)
- Uses Duke Pro Inc. USTI-ECO initiator for Robot use

Ideal Products has produced a user-friendly, shock tube free electric breech system. Our system can be used with several EOD tools, supporting 50 cap blasting machines and 24-volt robots. The blasting machine must be capable of putting out 300 volts. Robot conversion is not required with our electric breech system, by using a Duke Pro USTI-ECO.

The USTI-ECO will take the 24 volt impulse from the robot and charge itself up to 300 volts and discharge to fire the breech. This may take up to 4 seconds.

Kit K1090 or K1090A
Breech with initiator

K1090B or K1090BA
Breech only
