## K3150 Robot Disrupter Sleeve

- Designed to hold a disrupter from the gripper of a robot or mount to a tripod stand or robot arm via a picatinny rail.
- Can hold a 12in Tactical, 18in T3, or 24in PAN disrupter from Ideal Products (excluding RD24 fully rifled disrupter)
- Allows the disrupter to dislodge upon firing to reduce recoil force on robot or stand while remaining stationary during transport with the use of adjustable spring tension bearings
- Features three picatinny rail mounts on the outer surface to accommodate lasers (dot or line), flashlights, story stick, etc...
- Made of lightweight and durable Delrin plastic
- Weight (as shown): 2.15lb (0.977kg)
- Dimensions (w/o lasers): 6.125in x 3.5in OD (15.5cm x 8.89cm OD)

Shown With 12in Tactical Barrel

Shown With 24in PAN Barrel
