Protective Breech Caps (1113 & 4341)

- The protectors are made from titanium and weigh only 1 pound
- The only difference is the internal thread. The 1113 has a fine thread to fit the original PAN™ barrel and the 4341 has an ACME thread to fit the T3 disrupter barrel or the Tactical barrel.
- The breech plug does **not** come with the protector

Protective Breech Caps

4345

This protector is designed to fit over an existing cap and plug breech. There are 4 set screws to hold it to the cap portion of the breech.

4346

This protector is made of plastic and is to be used by slipping the shock tube through it and inserting the shock tube in to the breech, then sliding the protector over the breech.
